EDUCATION

Carnegie Mellon University, Pittsburgh, PA

Expected 05/2027

Master of Science in Information Security Policy and Management

Vellore Institute of Technology, Bhopal, Madhya Pradesh, India

08/2021 - 08/2025

Bachelor of Science in Computer Science specialization in Cybersecurity and Digital Forensics

SKILLS & CERTIFICATIONS

Security Tools & Platforms: SIEM (Splunk/ELK), Wireshark, EDR, IDS, IPS, Azure, DLP, IAM, Endpoint Security, SOAR, DNS, Nessus, Nmap, Burp Suite, Metasploit, TCPDump, Suricata, NIST, HIPAA, PCI, GDPR, ISO 27001

Scripting & Automation: Python, Linux, Windows, macOS, PowerShell, Bash, Security Automation, Yara Rules, CLI

Risk & Vulnerability Management: Penetration Testing, Vulnerability Scanning, Risk Management

Certifications: CISSP (pursuing), CompTIA Security+ (pursuing), Bits and Bytes of Computer Networks Google

EXPERIENCE

Payme Fintech Solutions - Credxo, Delhi, India

09/2024 - 07/2025

Technology Lead

- **Security Operations:** Reviewed 5,000+ payment transactions and user reported issues to point vulnerabilities and system weakness; provided actionable reports that improved platform reliability and security
- **Application Security:** Spearheaded the integration of security best practices into the SDLC, reducing critical vulnerabilities by 20% and time to patch by 4 days
- **Threat Reporting:** Developed 12 intelligence reports on threat patterns observed in internal security data

Project Management Officer

06/2024 - 08/2024

- **Project Workflow:** Developed a comprehensive project management dashboard that consolidated key performance indicators with project milestones, enabling project managers to track progress and identify bottlenecks, saving 5 hours per week
- **Reporting:** Improved and executed three critical documentation policies, including incident response and data breach guidelines, resulting in a 10% improvement in the company's overall security compliance score
- **Security Awareness:** Directed the implementation of an internal phishing simulation across 32 users, decreasing the risk of successful social engineering attacks, while training materials used company-wide

Hacker Bro Technologies, Tamil Nadu, India

06/2023 - 08/2023

Cybersecurity Analyst Intern

- **Incident Response:** Facilitated refinement of event correlation rules within SIEM to improve alert accuracy, reducing false positives by 15% and thereby reducing time spent on unnecessary investigation
- **Communication:** Streamlined the incident reporting process by creating easily understandable templates and providing clear summaries of security events to management, saving senior analysts four hours per week

ACADEMIC PROJECTS

SimplySecure

10/2025 - 12/2025

- **Security Architecture:** Built a comprehensive macOS security application using SwiftUI, implementing real-time app permission monitoring and automated vulnerability scanning for File Vault encryption, OS updates, and browser security
- **AI Integration:** Integrated Google Gemini and perplexity APIs for intelligent threat analysis and privacy policy assessment, reducing manual security evaluation time by 70% through automated risk detection
- **Phishing Simulation:** Deployed Retell AI-powered voice phishing simulation module for security awareness training, generating call scenarios with transcription and sentiment analysis

Cyber Threat Intelligence Analysis-Fortune 500 Energy Sector

08/2025 - 09/2025

- **Threat Intelligence Framework:** Computed comprehensive threat analysis for Fortune 500 critical infrastructure company, developing 6 Priority Intelligence Requirements (PIRs) and mapping threat actors using MITRE ATT&CK framework
- **OSINT & Reconnaissance:** Performed multi-phase OSINT gathering utilizing CVE/NVD databases, E-ISAC advisories and vendor intelligence feeds to identify attack surface across SCADA/OT systems and smart grid infrastructure
- **Fusion Center Design:** Architected threat intelligence fusion center with 11 specialized roles, defining SOC workflows for real-time monitoring, incident response and strategic threat analysis with \$1.3M annual operational budget

AI Security Project

01/2024 - 05/2024

- **Threat Modeling:** Built a malicious prompt injection scenario that embedded adversarial instruction in model input metadata to test LLM vulnerability, improving malicious prompt detection accuracy through targeted experiments
- **Adversarial Behaviour Analysis:** Evaluated model responses to injected adversarial prompts, identified behavioural inconsistencies and documented weakness that informed mitigation strategies for future model
