EDUCATION

Carnegie Mellon University, Pittsburgh, PA
Master of Science in Information Security Policy and Management

Expected 05/2027

Vellore Institute of Technology, Bhopal, Madhya Pradesh, India
Bachelor of Science in Computer Science specialization in Cybersecurity and Digital Forensics

08/2021 - 08/2025

SKILLS & CERTIFICATIONS

Frameworks and Standards: NIST CSF, PCI DSS, HIPAA, ISO 27001, GDPR, OWASP Top 10

Security Tools: Splunk, ELK Stack, Nessus, Burp Suite, Nmap, Wireshark, tcpdump, Suricata, Metasploit

Scripting and Systems: Python, Bash, PowerShell, Linux, SQL, C++, Java, Windows, macOS, Git, YARA, VMware

Collaboration Tools: MS 365 Suite (Excel, PowerPoint, Word), SharePoint, Trello, Google Workspace

Cloud/ Infrastructure: Amazon Web Services (AWS), Azure, GCP, Docker

Certifications: CISSP (pursuing), CompTIA Security+ (pursuing), Google Bits and Bytes of Computer Networking

EXPERIENCE

Carnegie Mellon University, Pittsburgh, PA
Graduate Teaching Assistant - Managing Products and Brands

01/2026 - Present

- Developed personalized support strategies for 40+ graduate students using Canvas LMS, directly raising project completion rates by 35% through targeted feedback and resource allocation

CredXO, Delhi, India
Project Management Officer

06/2024 - 06/2025

- Coordinated engineering workflows for 12-15 member development team at blockchain-based fintech startup, managing task assignments from C-suite leadership and tracking project milestone completion
- Reduced unauthorized access risk by 15% by implementing repository access control framework and enforcing least privilege
- Enforced security policies for corporate email usage and confidential data handling for cryptocurrency payment platform
- Facilitated cross-functional collaboration between backend and frontend development teams to ensure alignment on technical specifications, implementation approaches and improved delivery time by 25%
- Conducted business development outreach, presenting cryptocurrency payment platform capabilities to 2 prospective enterprise clients and directed Shark Tank INDIA pitch, securing 30 lakhs (\$36K)

Hacker Bro Technologies, Tamil Nadu, India
Cybersecurity Analyst Intern

06/2023 - 08/2023

- Completed intensive training in incident response, vulnerability assessment and security event monitoring using SIEM platforms
- Practiced penetration testing techniques including network reconnaissance with Nmap, packet analysis using Wireshark and web application security testing with Burp Suite
- Studied security frameworks including NIST and ISO 27001, along with compliance standards such as HIPAA, GDPR and PCI-DSS through case study analysis and documentation

PROJECT EXPERIENCE

XRPL Guardrails - Supply Chain Security SDK & Preflight System

01/2026 - 02/2026

- Engineered a TypeScript wrapper and preflight system for XRP Ledger Transaction, enforcing dependency pinning, SHA-256 lockfile integrity checks and npm audit policies to block critical vulnerabilities before sensitive blockchain action execute

SimplySecure

10/2025 - 12/2025

- Spearheaded macOS security application development via SwiftUI, embedding six security features enhancing data protection, user experience, and automated 70% of routine security checks, reducing risk assessment time

Change Healthcare Ransomware Attack

10/2025 - 11/2025

- Analyzed \$2.3B ransomware attack affecting 15 billion healthcare transactions, identifying MFA absence as root cause and developing threat intelligence report with HIPAA-aligned zero-trust and incident response recommendations

Cyber Threat Intelligence Analysis-Fortune 500 Energy Sector

08/2025 - 09/2025

- Simulated adversary behavior on HQ of a Fortune 500 energy company, conducted OSINT to identify vulnerabilities and phishing opportunities, documented threat actors, and reported findings from various stages of the Cyber Kill Chain with recommendations

RESEARCH

AI Security Research (under review)

01/2024 - 05/2024

- Developed ML threat detection framework for real-time detection, isolation and remediation of prompt injection vulnerabilities in LLMs, achieving 85-92% recall
